

ASQUITH BOYS HIGH SCHOOL

ELECTIVE COURSE BOOKLET

An Information Package for Students

Entering Year 10 in 2021

Exceptional Learning Opportunities for Boys

A MESSAGE TO PARENTS

Dear Parents/Carers,

There are many times in your son's school life when he has to make a decision. One of these times is coming up over the next few weeks.

Your Year 9 son will have the chance to think about what he is studying now and in most cases can decide if he wants to continue or change direction.

Choosing subjects is not always easy. It requires a lot of thought on the part of your son. We urge you to talk to your son about the selection process, and seek advice from the school if necessary.

The organisation of electives for 2021 is now underway. This booklet describes all the subjects and courses we have to offer. Students will be able to list in priority order their preferred subjects for 2021. The school then arranges the courses which attract enough students in three "lines". These are drawn up by computer to satisfy the subject combinations of as many students as possible.

This is a time consuming process and requires your son to read the information provided in this booklet and clearly follow the instructions given. We usually do not decide final class compositions until Term Four to enable the largest possible number of students to study the subjects of their choice.

We would recommend that you participate in this process with your son, but ask you to recognise that it is ultimately your son's choice of subjects, that he enjoys and will do well at.

Regards,
Bryce Grant
Principal

CONTENTS OF THIS BOOKLET

1. NSW Record of School Achievement (RoSA)
2. How our elective system operates
3. Summary of School Subjects and Courses Offered
4. Advice to Students Entering Year 10 in 2021
5. Description of RoSA Courses
6. Interest Electives
7. Saturday School of Community Languages
8. The NSW School of Languages

Subject selection for 2021 will be completed through an on-line platform. Details of how to select electives for Year 10 will be emailed to all parents.

NSW RECORD of SCHOOL ACHIEVEMENT (RoSA)

Eligible students who leave school before receiving their Higher School Certificate receive the **NSW Record of School Achievement (RoSA)**.

A cumulative credential – recognising all your academic achievements

Instead of just showing what your results were at the end of Year 10, the RoSA recognises that many students who leave school before completing their HSC continue on to complete some further courses.

- The RoSA will show your Year 10 grades, as well as any grades for Year 11 courses completed after that. If you start a course but leave school before completing it, your RoSA will show evidence of your enrolment.
- Your RoSA will also show results of any VET or Life Skills courses you complete in Year 10 and/or Year 11.
- Your RoSA grades will be determined by your teachers using established guidelines & processes to ensure consistency of judgement. All Year 10 & Year 11 subjects are graded from A to E.
- Grades for all your courses in Year 10 & Year 11 will be based on your results in assessment tasks you do throughout the year. Assessment tasks may include tests & assignments, developed & used in your school.

NOTE: The NSW Record of School Achievement (RoSA) is issued only when a student leaves school before completing the Higher School Certificate

HOW DOES OUR ELECTIVE SYSTEM OPERATE?

At Asquith Boys High, students in Stage 5 (Years 9 and 10) have a core set of subjects which are. These core subjects are: English, Mathematics, Science, Mandatory History, Mandatory Geography and PDHPE.

On top of these core subjects, students are required to study 3 elective courses in each year in Stage 5 (a total of 6 electives across the 2 years). Our elective subjects are divided into 100 hour courses across Year 9 and Year 10. Each course lasts for one year and is studied over 5 periods per cycle (2 weeks). The elective subjects are usually open to both Year 9 and Year 10 students each year, meaning the courses have a mix of both years and students progress from course to course, rather than from year to year.

Different combinations of these courses give students the chance to:

- concentrate on areas of interest, for example by studying more of a subject
- just "taste" a subject for a year
- take a course just for interest and not as part of a longer study.

When we use the word "subject" we refer to a syllabus set down by the NSW Education Standards Authority (NESA), for example, Industrial Technology, Commerce, etc. By the word "course" we mean one year of study (which is equal to 100 hours of study). All of our courses will contribute to the required study of a minimum of 100 hours of a Stage 5 subject. The rules of NESA allow us to also offer interest courses in Stage 5 which are not recorded on the RoSA.

HOW DOES IT WORK IN PRACTICE?

How do students progress through this different pattern of electives? Let's take a typical current Year 8 student. We'll call him Ted.

During June, Ted (and his parents) will be given a list of the elective courses to be offered at Asquith Boys High School in 2021. Some examples of elective courses currently studied at our school include: Commerce, Elective History, Industrial Technology - Building and Construction, Industrial Technology Metal 1, Drama, etc.

Ted will need to put forward 6 elective options for that year, though he will only study 3. After Ted makes his initial selection of courses, the school works out which courses have attracted enough students to run in 2021. We then arrange these courses into three lines. In other words, Ted will be studying 3 elective subjects in Year 9. The same process is followed for Year 10 selections. Just as in ANY system of elective subject organisation, not every student will get all his first choices.

In the Industrial Technology subjects, some courses will be PREREQUISITES for others. i.e. They must be studied in Year 9 BEFORE another in the same subject is studied in Year 10. Usually the more difficult courses can be studied only if a student has met the requirements of the beginning course.

As well as being given a list of courses, Ted will be given further advice:

- He will get a description of what each course is all about.
- He will be informed of any costs involved in each course.
- He will be told that there will be some courses he **MUST DO**.

The last point is important. To satisfy requirements for Stage 5, Ted must complete some minimum requirements. Students must study the core subjects English, Mathematics, Science, Mandatory History and Mandatory Geography and PDHPE.

Of course, Ted may decide to do more than the bare minimum (100 hours) needed for an elective subject. He might like Visual Arts and try to complete as many Art courses as possible. On the other hand, he might try to spread his studies to a number of other courses.

If Ted needs to spread his studies more widely, he might build his pattern of courses in a different way. There will be some restrictions on this based on the Stage 5 rules.

What is more likely is that Ted will build his "blocks" up and across at the same time. In other words, he would be doing some more challenging courses as well as others just for interest.

Of course, Ted will be making his choices one year at a time. At this stage, Ted will already be studying his Year 9 courses and will make choices for Year 10 in June this year. All the time he will make his choices according to his plan for both Years 9 and 10, **BUT** he will have a chance to make changes to his chosen pattern of study at various times. Don't forget, students will study 6 of these elective courses over Years 9 and 10 - three in each year.

We must in fairness say that some things will influence Ted's elective choices and the courses he completes:

1. Parents and teachers will help guide Ted to sensible choices, especially to complete his Stage 5 requirements.
2. If Ted doesn't meet the requirements of a course he may be asked to do the course again if it is available or choose courses in another subject
3. If only a few students are attracted to a course it will not run. This means that Ted might only get his second preference for a particular year.

All students and parents should note that not all elective subjects will run for **two** years. Some subjects may attract enough students to only run for one year. This is certainly better than not being able to study it at all. **Note that NESAs requires a minimum of one year of study** (100 hours) of an elective subject for it to appear on the RoSA, and the RoSA will include all subjects successfully studied in Years 9 and 10, except the interest electives.

ADVANTAGES

For Ted and all students there are a number of advantages of our elective system:

- In the main, students are doing a course because they want to, and teachers are teaching courses that they like teaching. This creates a better classroom and school atmosphere.
- Students are sometimes able to change direction if they discover that certain courses are not meeting their needs. **THEY CAN ONLY CHANGE WITH THE PERMISSION OF PARENTS and THE SCHOOL.**
- Where NESAs rules allow, special courses can be created to meet special needs.
- Most important of all, by combining Year 9 and Year 10, there is a wider choice of electives at Asquith Boys High School.

STAGE 5 = Years 9 and 10

To satisfy minimum requirements for Stage 5 a student must complete, before the end of Year 10:

- English, Mathematics, Science and PDHPE. At Asquith, we have kept these subjects in our core, and they are studied throughout each of Years 9 and 10.
- 100 hours of Mandatory Geography and 100 hours of Mandatory History
- Minimum requirements in a range of other subjects such as Design and Technology, Languages etc. *At Asquith Boys High School we complete all these in Years 7 and 8.*
- Elective courses, subject to minimum requirements described in this book.
- NESA rules state that a maximum of 2 courses of Industrial Technology can be studied for Stage 5.

Grades (A,B,C,D, or E) for Stage 5 are awarded by the school in English, Mathematics, Science (400 hours), PDHPE (100 hours), Australian Studies and in all other subjects studied in Years 9 and 10 where:

1. The subject has been studied for 200 hours
– or –
2. The subject has been studied for 100 hours

The school may also award an "N" determination for subjects, which have not been satisfactorily completed.

NOTE: Some courses incur a course cost or fee. These are amounts that must be paid at the beginning of the year if students wish to enrol in these courses. Parents should either pay the amount specified for the course or contact the Principal in writing, requesting assistance from the Student Assistance Scheme.

TAFE Delivered VET Courses for Stage 5 (TVET)

WHAT IS TVET?

The TVET program gives Year 10 school students the opportunity to study modules from TAFE courses as part of their Stage 5 studies. The courses offer further relevant vocational subjects not available in schools and provide insights into future careers thus enabling students to make informed decisions about further training.

Study of a VET course by students in Stage 5 (Year 10) should be considered an option if the course suits a student's individual needs and provides a viable pathway to employment or their career transition plan.

Note:

1. Students will only be able to access **one** Stage 5 TAFE Delivered VET Course
2. Students must be a minimum of 15 years of age.

A TVET Course may be studied in addition to the elective subjects studied at school. It **may not** replace any of the mandatory subjects.

TVET Courses **ARE NOT TIMETABLED** by the school.

Students undertake lessons at TAFE one day per week. **It is required that work missed due to TAFE attendance will be completed by TVET students in their own time.** All TVET students will be required to undertake the assessment tasks for each of their school subjects that may or may not include reference to the work missed.

The application for a TVET course is **separate** to the subject selection process. Acceptance into a course **should not** be assumed. **Application forms will be available from Mr Broome at a later date.**

Selection Criteria

The following criteria will be used in selecting students for studying Stage 5 VET Courses at TAFE such as:

- Reliability and punctuality
- Appropriate behaviour at all times (in class & throughout the College/Campus)
- Politeness and respectfulness at all times to teachers & students
- Application to studies, maturity and suitability to an adult Learning Environment and
- Commitment to completing the course
- Good communication skills
- Ability to work well within groups and as part of a team
- Demonstrated ability to travel independently to TAFE
- ATTENDANCE AT ALL LESSONS

Stage 5 TVET Courses that were available to Year 10 in 2020 are:

- Certificate 1 Manufacturing Pathways (Fashion) - 100 hours
- Certificate 1 Hospitality – Café Skills - 100 hours
- Certificate 1 Manufacturing Pathways (Timber) - 100 hours

(Note: Manufacturing Pathways (Timber) is offered by ABHS in 2021. Students doing it as an elective at ABHS cannot take this course at TAFE.)

NOTE: Not all courses are offered each year. New courses may be added in 2021. Courses for 2021 to be advised by TAFE in Term 3 2020.

Now look at the next page, read the Summary of School Subjects & Courses being offered for 2021, then read the Advice to Students Entering Year 10 in 2021.

SUMMARY OF SCHOOL SUBJECTS, COURSES & COSTS

The key learning area (main category of the subjects) is indicated in **BOLD** type.

The Stage 5 course is indicated in *italics*.

Key Learning Area	Stage 5 Subject Courses	Cost
HUMAN SOCIETY & ITS ENVIRONMENT	<i>Elective Geography</i>	<i>Nil</i>
	<i>Elective History</i>	<i>Nil</i>
	<i>Commerce</i>	<i>\$30</i>
COMPUTING	<i>Information & Software Technology</i>	<i>\$20</i>
PDHPE	<i>Physical Activity & Sports Studies</i>	<i>\$20</i>
LANGUAGES OTHER THAN ENGLISH**	<i>LOTE Taster</i>	<i>\$30</i>
CREATIVE ARTS	<i>Drama</i>	<i>\$60</i>
	<i>Music</i>	<i>\$60</i>
	<i>Visual Arts</i>	<i>\$100</i>
	<i>Photographic & Digital Media</i>	<i>\$100</i>
	<i>Ceramics</i>	<i>\$100</i>
TECHNICAL & APPLIED STUDIES (TAS) # NOTE: Only 2 Industrial Technology focus areas may be counted towards the Stage 5 RoSA. Only one of Art Metal or Metal 1/2 may be chosen	<i>Industrial Technology - Building & Construction 1</i>	<i>\$150</i>
	<i># Building & Construction 2 (Year 10 only)</i>	<i>\$150</i>
	<i>Industrial Technology – Engineering 1</i>	<i>\$130</i>
	<i># Engineering 2 (Year 10 only)</i>	<i>\$140</i>
	<i>Industrial Technology - Metal 1</i>	<i>\$140</i>
	<i># Metal 2 (Year 10 only)</i>	<i>\$120</i>
	<i>Industrial Technology - Art Metal 1</i>	<i>\$160</i>
	<i>Industrial Technology - Timber 1</i>	<i>\$150</i>
	<i># Timber 2 (Year 10 only)</i>	<i>\$150</i>
	<i>Food Technology (Year 10 only)</i>	<i>\$150</i>
INTEREST ELECTIVE *Note: This will not appear on the RoSA	<i>Philosophy</i>	<i>Nil</i>

NOTES:

**Individuals may be able to apply to study Languages other than LOTE Taster through the NSW School of Languages or the Saturday School of Community Languages for Stage 5 electives. See Mr Hoareau for eligibility requirements and application forms.

Industrial Technology subjects marked # require students to have completed the linked 100 hour Year 9 course as a prerequisite (see table) and will constitute 200 hours in that Industrial Technology focus area.

ADVICE TO STUDENTS ENTERING YEAR 10 IN 2021

Make sure you have read the first part of this booklet. It explains generally how subjects and courses are chosen for study in Stage 5 (Years 9 and 10). You will study 3 electives in Year 10.

Make sure you know the difference between a subject and a course:

A **subject** is a NESAsyllabus. The elective subjects offered at Asquith Boys High are: Elective History, Elective Geography, Industrial Technology (Building and Construction, Engineering, Metal and Timber), Commerce, Music, German, French, Visual Arts, Information and Software Technology, Food Technology, Textiles, and Drama.

At Asquith Boys, these subjects are further divided into 100 hour **courses**. Students should note that if you choose to continue and do another 100 hour course in the same subject in Year 10, you will not repeat any topics. See the course descriptions that are provided in this book.

It is now time to choose your elective courses. **This will be done through an on-line platform.** Courses which don't attract enough students will not run in 2021. Note that you select subjects and courses in order of preference. If your higher preference courses don't run, we look at your next preferences. **Consider all your preferences very carefully.**

During July/August we arrange the most popular courses into lines so that you are doing one course from each line. We then arrange our classes and teachers for 2021.

Think carefully about your preferred subjects and courses. You want to do well in the Stage 5 RoSA, so choose subjects you like and subjects that you feel you can achieve in. If you have certain career interests, choose subjects that might help you. You might choose to concentrate on a few subjects or you might spread your studies over a lot of subjects.

SOME RULES

There are some rules to follow, mainly for the award of the RoSA:

1. All students choose 3 electives to study in Year 10.
2. The minimum requirement for a course to appear on the RoSA is that it must be studied for 100 hours (1 year)
3. Courses that are studied for only one year, either in Year 9 or in Year 10, are recorded as 100 hour courses on the RoSA. Courses that are continued from Year 9 and into Year 10 will show as a 200 hour course on the RoSA.
4. Students **may not** study more than 2 courses of Industrial Technology for the Stage 5 RoSA (Timber, Metal, Engineering, Building and Construction). Additional courses may be studied as interest electives, only if places are available and as such will not be recorded for the RoSA.
5. Students **may not** study both Metal and Art Metal.

COURSE DESCRIPTIONS:

The courses offered for 2021 are described in the next few pages. Keep in mind that:

1. There are subject costs attached to some courses.
2. Some courses have to be completed before others are attempted. These courses are called prerequisites.
3. Some elective courses might not run in 2021. There is no guarantee that the elective you chose in 2020 will run for two years. You may even have a clash of choices when the lines are established.

- All subjects, except interest electives, that you study for at least one year, will be listed on your RoSA
- You will be given a Grade (A to E) for each subject, unless deemed to be unsatisfactory.
- Students in danger of being considered unsatisfactory will be given adequate warning to make the required improvements.

WHAT DO YOU DO NOW?

Read the course descriptions, and talk it over with your parents and teachers. Think especially about your interests and abilities.

Complete your on-line form, print it and have it signed by a parent, then hand it to Mr Hoareau by Friday 26 June.

HUMAN SOCIETY & ITS ENVIRONMENT

ELECTIVE GEOGRAPHY

The Elective Geography courses in Year 9 and 10 are aimed at giving students a Geographical focus on the world around us, by studying 4 of the Great Continents of the world - South America, Africa, North America and Europe. Each course looks at varied People and Places, Environments, Landforms, Agriculture, Economies, Cities and Cultures that exist across the globe. Students will gain an understanding of the world around them through Geographic Enquiry and build on their Geographical skills (Eg, Mapping and Fieldwork).

Stage 5 Subject: Elective Geography

Prerequisite: None

Subject Costs: Nil

More Information: See Mr Laing

Semester 1 Course Content: *SOUTH AMERICA - AMAZON and ANDES*

- The World's Biggest River Basin and Rainforest
- The volcanoes and earthquakes that have formed the Andes
- The World's Driest Desert - The Atacama
- Mardi Gras in Rio De Janeiro
- The Incas of Machu Picchu
- The Great Salt Lakes of Bolivia
- Google Transect across South America

Semester 2 Course Content: USA

- A Land of 50 States (with liberty and justice for all?)
- The Grand Canyon of Arizona
- The "Super- Volcano" of Yellowstone National Park
- The Spectacular Rocky Mountains
- "Tornado - Alley" and Hurricanes in the South-East
- New York - The world's original "mega-city"
- Gun Ownership - A Legal Right to Bear Arms
- Google Transect across North America

ELECTIVE HISTORY

Why you should study Elective History!!

- In Elective History we study many historical subjects that you do not cover in other history courses.
- It is a disciplined process of inquiry into the past that helps to explain how people, events and forces from the past have shaped our world.
- It allows students to locate and understand themselves and others on the continuum of human experience up to the present and to see their place in this continuum.
- History provides opportunities for students to explore human actions and achievements in a range of historical contexts.
- Students become aware that history is all around us and that historical information may be drawn from the physical remains of the past as well as written, visual and oral sources of evidence.
- Excursions wherever possible are a part of this course, and we will take advantage of touring Exhibitions and Displays wherever possible.

Students will value and appreciate:

- ☑ history as a study of human experience
- ☑ the opportunity to develop a lifelong interest in and enthusiasm for history
- ☑ the nature of history as reflecting differing perspectives and viewpoints
- ☑ the opportunity to contribute to a just society through informed citizenship
- ☑ the contribution of past and present peoples to our shared heritage
- ☑ our own contribution to our shared heritage

Stage 5 Subject: Elective History

Prerequisite: None

Subject Costs: Nil

For more information: See Ms Cufre

Semester 1 Course Content: *An Introduction to Modern History*

Topic 1: History, Heritage and Archaeology

- Film as history – The modern world through a dark lens.
- An introduction to the shocking world of modern history

Topic 2: Ancient, Medieval and Modern Societies

- Modern Society – The Americas
- North American Indians

Semester 2 Course Content: Options

Topic 3: Thematic Studies

Specific topics to be chosen according to student interest

- Power and political unrest
- Heroes and villains

COMMERCE COURSE

Commerce is the study of consumer, financial, business, legal and employment matters. It develops decision making and problem solving skills in relation to commercial and social contemporary issues. In addition students are engaged in research and communication further enhancing their academic outcomes. Individual values and attitudes on topics of study can be expressed in an open classroom environment.

Students undertaking **100** hours of Commerce must complete one core topic and 50 hours of option topics as part of their Stage 5 ROSA.

Students undertaking **200** hours of Commerce must complete both of the core topics and 100 hours of the option topics as part of their Stage 5 ROSA.

Stage 5 Subject: Commerce

Prerequisite: None

Subject costs: \$30

For more information: See Ms Cufre, Ms Parker or Mr Laing

CORE TOPIC offered in 2021	OPTION TOPICS offered in 2021
<p>(50 hours)</p> <p>LAW and WORK</p> <ul style="list-style-type: none"> • Law and Society • Employment Issues  	<p>LAW and GOVERNMENT</p> <ul style="list-style-type: none"> • Role of law in Australian society • Voting • Citizenship  <p>RUNNING A BUSINESS</p> <ul style="list-style-type: none"> • Running a business • Promoting and selling • E-commerce  

COMPUTING

Course Content: This course is designed to provide students with a sound knowledge of how computers work, their contribution to society and their future directions. The course provides students with the opportunity to select from a wide range of computing skills.

Stage 5 Subject: Information and Software Technology

Prerequisite: None

Subject costs: \$20

For more information: See Mr Kanny

Assessment:

60% Practical work where students learn and demonstrate new computing skills

40% Theory work where students learn the theory behind computing and computer applications.

Core Topics: Throughout the course students will learn about the core topics of:

- Designing, Producing and Evaluating Projects
- Current and emerging technologies
- Data Handling
- Hardware
- Social Issues related to computing devices
- People involved in technology
- Software

Elective Topics: Students will also choose one elective topic for each semester of the course. 100 hour students choose two elective topics and 200 hour students choose 4 elective topics from the options below.

Topic 1. Software Design – Students learn to use programs like Just Basic and Kodu to design and create computer programs.

Topic 2. Website Design – Students learn to use HTML language and Adobe Dreamweaver to create professional looking websites including text, images, flash animations, templates and menus.

Topic 3. Multimedia – Students learn to use programs like Adobe Premier to create professional multimedia videos while editing and mixing a number of video tracks, audio tracks and managing transitions.

Topic 4. Artificial Intelligence and Modelling – Students learn how Artificial Intelligence programs function and look at modelling programs that can be used to make intelligent decisions based on accurate models.

Topic 5. Digital Media – Students learn to use programs like Adobe Photoshop and Adobe Flash to create images and animations for games, website banners etc.

Topic 6. Database Design – Students learn to create Relational Databases to store data. They learn to develop queries to extract required data and learn to produce reports.

Course Delivery: One of the problems with computing courses is the wide range of abilities students have when entering the course. The following measures have been put in place to assist students who feel they need assistance in this course.

- Students will be guided through the course by their teacher but the **online nature of the course** means that students who want to work at a faster pace will be able to do so.
- All notes, assignments and tutorials are **provided on line** and students can access the work from school or home. All work is also submitted on line.
- **Students can work individually or in groups of up to three.** This is designed to cater for the individual learning styles of students and to allow them to help each other to progress.
- All practical demonstrations are **provided in the form of videos** allowing students to view them whenever they want and to work through them at their own pace.
- At the start of each year, each class will choose which two electives will be studied. Students returning in the second year will then choose a further two electives. All students doing the subject in Years 9 and 10 will complete the 4 most popular electives from the 6 on offer.
- All students work on the basic practical tasks but students who finish early are invited to enhance their answer by experimenting with the program they are using to demonstrate additional skills.
- On occasions, students working at their own pace will finish the course early. If this happens, they negotiate a contract with the teacher to complete suitable work in the field of computer technology.

PDHPE

Stage 5 Subject: PHYSICAL ACTIVITY AND SPORTS STUDIES (PASS)

Prerequisite: None

Subject costs: \$20

For more information: see PE Staff

About the course: A fun and highly practical course that aims to extend to students beyond the core PDHPE syllabus covering physical skills, tactics and rules of the games as well as anatomy, physiology, sport in society, outdoor recreation, aquatics and sports coaching. The scope of practical activities in the course goes beyond the more conventional sports taught in the mandatory PDHPE course. In Year 10, students undertake their Bronze Medallion and then take on leadership roles assisting with the Year 7 Swim and Survive program. Topics in 2021 will be different to the topics that were taught in 2020.

LANGUAGES OTHER THAN ENGLISH - LOTE

日本語

にほんご

Course Title: Japanese for Beginners Stage 5

Stage 5 Subject: Japanese

Prerequisite: None

Subject costs: \$30

For more information: see Ms Lorrae

About the course:

This course is designed to introduce students to the Japanese language and culture of Japan and to apply this knowledge to one's own personal world.

Students will explore connections between Japanese language and culture through the use of particular expressions and communicative behaviours, plus recognise values that are important to Japanese-speaking communities. They will be provided with opportunities to understand that people view and experience the world in different ways, and to reflect on and deepen their understanding of their own heritage, values, culture and identity.

Students will learn to converse in Japanese about familiar topics including themselves, where they live, places they like to go and activities they like to do. Plus some everyday situations which they could apply to their real world e.g. buying items from a shop or ordering from a menu. Communicative learning tasks are designed to create authentic real-life contexts for speaking in Japanese to support students in developing their language ability. There will be an emphasis on the four macro skill areas of Speaking, Listening, Reading and Writing and students will engage in Japanese texts and resources to obtain, interpret and evaluate information.

A lot of learning is achieved through games and hands on activities. With opportunities for various crafts, art, drama, role plays, food experiences and Japanese style drumming and flute playing if the students are interested.

There are many benefits to studying a second language. Throughout the year, some of these that the students will discover are that they will develop their understanding of the power of language, discover new ways of learning, new ways of knowing and more about their own capabilities.

Learning Japanese will also provide them with the cognitive tools and strategies to better understand and improve their first language.

NOTE: Individuals may be eligible to apply to study other languages through the Open High School or the Saturday School of Community Languages as part of their Stage 5 studies. Further information is attached at the end of this booklet. See Mr Hoareau for eligibility requirements and application forms.

CREATIVE ARTS

DRAMA

Stage 5 Subject: Drama

Prerequisite: Nil

Subject costs: \$60

For more information: see Ms Robson or Ms Gowthorp

About the course: This course is an introduction to various aspects of Drama. Students are taught all the basic foundations of drama. They build collaborative skills, learn the importance of rehearsal and practice, and develop self-esteem and confidence. Students will have many opportunities to tap into their imagination and creativity. Students will be involved in making, performing and appreciating theatre. Students will develop acting skills, improvisation and play building techniques, and confidence. This course is for students interested in acting, scriptwriting, set design, costume design, film, plays, live performance, directing and lighting and it provides a solid foundation for students wishing to study this subject in Years 11 and 12.

NOTE: All Drama students are required to perform to audiences in the classroom and school environment as part of their course assessment. Students will be invited to audition for the Music and Drama (MAD) night in June.

MUSIC

Stage 5 Subject: Music

Prerequisite: None

Subject costs: \$60

For more information: see Ms Robson or Mr Newton

About the course: This course is aimed at introducing students to the fundamentals of music through experiences in performing, composing and listening. Students will be encouraged to respond to music personally, through a wide involvement in music activities. These will include:

- experiences in performing, creative expression and listening
- opportunities to experiment with sounds and learn music terminology
- experiencing and evaluating music of many different styles/cultures
- assistance and encouragement to express their musical ideas through original compositions and arrangements
- discussions of the meaning and value of music in our society
- encouragement to learn an instrument and form musical groups
- extension study available for advanced students

NOTE: All Music students are required to perform to audiences in the classroom and school environment as part of their course assessment. Students will be invited to audition for the Music and Drama (MAD) night in June.

VISUAL ARTS

NOTE: All Visual Arts students are required to be active curators in the Annual Art Exhibition and other Common Room Exhibitions throughout the Year.

Stage 5 Subject: Visual Arts

Prerequisite: Year 7 and 8 Visual Arts

Subject costs: \$100

For more information: see Ms Robson or Ms Cooke

It is not necessary to be good at drawing to choose Visual Arts, you just need to be dedicated to learning how to improve! The course builds high levels of skills in a variety of artmaking media and students are encouraged to think and operate as an artist with their artworks. It allows students to think and respond to their world in a visual way challenging them to view the world differently. It will build a 'visual vocabulary' so that they can produce quality, interesting and creative works. Students are introduced to a variety of media/art forms. Students learn how to DRAW and PAINT using a variety of 2 dimensional media on a variety of surfaces. They will SCULPT and build CERAMIC works to build understandings about working in a 3 dimensional way. They will also DIGITALLY PHOTOGRAPH their world and use ADOBE PHOTOSHOP and ILLUSTRATOR to manipulate these images. They will explore PRINTMAKING (both LINO and ETCHING). Artmaking will be supported by the study of relevant artists or artworks. Assessment is 70% practical and 30% written.

PHOTOGRAPHIC and DIGITAL MEDIA

Stage 5 Subject: Photographic and Digital Media

Prerequisite: Year 7 and 8 Visual Arts, access to a digital camera is required.

Subject costs: \$100

For more information: see Ms Robson or Ms Cooke

This course aims to develop skills and understandings about how cameras and photographic materials function. Students create 'personal photographic portfolios' that explore particular subjects. Students will have opportunities to explore traditional wet photographic practices as well as digital processes. They will also explore the way that photography has been changed by smart phones and social media. Students will be encouraged to carefully consider their photographic intentions in the taking and processing of photographs to develop high levels of skill and excellent quality works. Making practices for quality photographic imagery are explicitly taught and students will have opportunities to work individually and collaboratively. Students will be required to participate in photographic shoots in sites of interest around the local and greater Sydney area. Excursions to photographic exhibitions support students in their study of photographic and digital practice. It will benefit students greatly to have access to a digital SLR camera, if possible, to assist their learning.

Assessment is 70% practical and 30% written.

CERAMICS

Stage 5 Subject: Ceramics

Prerequisite: Year 7 and 8 Visual Arts

Subject costs: \$100. Students will also be required to supply their own clay kit.

For more information: see Ms Robson or Ms Cooke

For those who really love to get dirty with 3 dimensional works! This is a course 'working in clay', that concentrates on building a wide range of ceramics skills in building ceramic forms and surface decoration. Students will work in ceramics as both a sculpture and design medium, operating as a ceramicist with particular intent in their works, creating ceramic works that are functional and/or simply sculptural. All artmaking will be supported by the study of relevant artists, art works and art movements. Students will work on subjects ranging from figurative sculptures, animals and relief works to vessels and functional forms. This is a very hands-on dynamic course.

Assessment is 70% practical and 30% written.

TECHNOLOGICAL & APPLIED STUDIES

FOOD TECHNOLOGY

Stage 5 Subject: FOOD TECHNOLOGY

Prerequisite: none. This is a Year 10 class only.

Subject fees: \$150

For more information: See Ms Adam, Mr Hughes or Mrs Bird

The study of food technology provides students with a broad knowledge and understanding of food properties, processing, preparation and their interrelationship, nutritional considerations and consumption patterns and the importance of hygiene and safety in the production of food.

Food specific skills developed by students are applied to a range of contexts enabling students to produce quality food products. Students develop practical skills in preparing and presenting food, selecting and using appropriate ingredients, methods and equipment. Students will explore food related issues, allowing them to make informed and appropriate choices.

In Year 10, students will go into more depth regarding food hygiene and preparation and will work on focus areas that include; Food in Australia, Food Product Development, Food for Special Needs and Food Service and Catering.

Food Technology has a significant knowledge component as well as the practical cooking component. Students electing this course need to be aware of this as they may otherwise elect the course for the wrong reason.

Course requirements:

- Students are responsible for providing an apron and black leather shoes, for hygiene and safety reasons.
- Students will also need a book and display folder.

INDUSTRIAL TECHNOLOGY

This syllabus covers a number of focus areas in the field of technology. At ABHS the focus areas offered are Engineering, Metal, Timber and Building and Construction.

Each focus area is divided into two compulsory core modules (50 hours each) that lead to a range of optional specialised modules to be studied for not less than 50 hours each in Year 10. Individual modules (core and specialised) provide specific content related to the focus areas which will be developed in the key areas of:

- Work, Health and Safety (WHS)
- Materials, Tools and Techniques
- Design
- Links to Industry
- Workplace Communication
- Societal and Environmental Impact.

Students may study up to 2 focus areas based on the Industrial Technology syllabus. Where a student undertakes two courses in Industrial Technology, they must be from different focus areas. Each course may comprise:

1 focus area studied for 100 hours (core modules only) **or**
1 focus area studied for 200 hours (core modules plus 2 specialised modules).

Course combinations in Industrial Technology Years 9–10 may include:

- 1 x 100-hour course
- 1 x 200-hour course
- 2 x 100-hour courses
- 2 x 200-hour courses
- 1 x 100-hour course and 1 x 200-hour course.

Each course must be based on the study of one focus area only. We may allow extra courses to be taken as **interest electives** but only if there are vacancies in the course.

TAS Electives

Electives in TAS are divided up into four different focus areas:

Building and Construction, Engineering, Metal and Timber

N.B.: Only two Industrial Technology focus areas may be studied for the RoSA.

Industrial Technology	May be studied in either Year 9 or Year 10	Year 10 only
Focus Area	Core Module 100 hours total	Specialised Module(s) 100 hours total
Building and Construction	Building & Construction 1	Building & Construction 2
Engineering	Engineering 1 (Structures/Mechanisms)	Engineering 2 (Control Systems/Alternative Energy)
Metal (only 1 stream of metal may be taken)	Metal 1	Metal 2 (Fabrication)
	Art Metal 1	Art Metal 2
Timber	Timber 1	Timber 2

Focus Area: BUILDING & CONSTRUCTION

Course Title: BUILDING & CONSTRUCTION 1

Stage 5 Subject: Industrial Technology (Building and Construction)

Prerequisite: None

Subject costs: \$150

For more information: see Mr Philip, Mr McGowan or Mr Hughes

About the course: This course provides an introduction to the construction industry and to building industry skills. Students develop hand and machine skills by completing a number of practical projects, such as a site toolbox. Students intending to do work experience in the Construction Industry will find this course useful, and will be offered an opportunity to obtain a Site Induction Certificate. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Course Title: BUILDING & CONSTRUCTION 2

Stage 5 Subject: Industrial Technology (Building and Construction)

Prerequisite: None

Subject costs: \$150

For more information: see Mr Philip, Mr McGowan or Mr Hughes

About the course: This course provides a more in-depth look at the construction industry and to building industry skills. Students further develop hand and machine skills they learned in Building and Construction 1 by completing higher level projects with the addition of landscaping materials and processes. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Focus Area: ENGINEERING

Course Title: ENGINEERING 1

Stage 5 Subject: Industrial Technology (Engineering)

Prerequisite: None

Subject costs: \$130

For more information: see Mr Philip, Mr Hughes or Mr McGowan

Semester 1 Course: Structures

Students learn about the characteristics of a range of different materials such as hardness, ductility as it effects metals, composites and other materials. They will study and construct experiments in building and testing engineering structures that may include bridges, towers and buildings. They will study the forces that act on these structures as well as how the areas of workplace communication, design and OHandS relate to these topics. This is a mostly practical course but theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Semester 2 Course: Mechanisms

Students increase their knowledge gained in Structures regarding the characteristics of materials looking at toughness, malleability, corrosion resistance and shear strength. They will study and construct experiments in building levers, pulleys, gears and cams. They will study the forces that act on these mechanisms as well as how the areas of workplace communication, design and OHandS relate to these topics. This is a mostly practical course but theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Course Title: ENGINEERING 2

Stage 5 Subject: Industrial Technology (Engineering)

Students: Year 10 only

Prerequisite: Engineering 1

Subject costs: \$140

For more information: see Mr Philip, Mr Hughes or Mr McGowan

Semester 1 Course: Control Systems

Students increase their knowledge gained in Mechanisms by learning about metals, alloys, polymers and ceramics; electromagnetic induction and induction motors. They will study and construct experiments in areas such as robotics, sensors, actuators, hydraulics and pneumatics. They will use a 3D printer to produce parts of their projects. They will study the forces that act on these control systems as well as how the areas of workplace communication, design and WHS relate to these topics. This is a mostly practical course but theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Semester 2 Course: Alternative Energy

Students study alternative sources of energy such as wind, solar, wave and geothermal power. They will experiment in the production of projects such as a wind turbine or solar powered vehicles, and look at how alternative energy can impact on society and the environment. They will use a 3D printer to produce parts of their projects. This is a mostly practical course but theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Focus Area: METAL

Note: Students may choose only one of Metal 1 or Art Metal 1

Course Title: METAL 1

Stage 5 Subject: Industrial Technology (Metal)

Prerequisite: None

Subject Cost: \$120

For more information: see Mr Philip

About the Course: This exciting and popular subject will enable the students to produce a range of interesting projects using both sheet metal and large sections of ferrous and non-ferrous metals. Students make projects such as a centre punch, tool box, a hammer and more. Skills include hand work, cutting, joining, lathe work and other types of machining, forging (furnace work), brazing, heat treatment and more. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Course Title: METAL 2 (FABRICATION)

Stage 5 Subject: Industrial Technology (Metal)

Students: Year 10 only

Subject Cost: \$120

Prerequisite: General Metal 1 (2020)

About the Course: Students will build on their knowledge of the safe use of hand, portable and fixed power tools and machinery. They will use these machines to produce a folding shovel and a student design project. They will study how these tools and techniques relate to society and the environment. Oxy/acetylene and MIG welding is introduced as part of this course. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Course Title: ART METAL 1

Stage 5 Subject: Industrial Technology (Metal)

Prerequisite: None

Subject Cost: \$160 (includes one sterling silver ring)

For more information: see Mr Philip

About the Course: Students learn about different types of metal and their uses in practical and/or decorative applications. They will be working with silver and other ferrous and non-ferrous metals. They will find out how these metals are cut and joined, hardened and softened, shaped and formed, coloured and polished. Skills include heat treatment, soldering, forming, planishing, forging, bending, riveting and more. Projects may include rings, silver jewellery, tableware, ornaments, outdoor accessories, forged work.

Focus Area: TIMBER

Course Title: Timber 1

Stage 5 Subject: Industrial Technology (Timber)

Prerequisite: None

Subject costs: \$150

For more information: see a TAS teacher

About the course: Students will be instructed in the methods of designing and manufacturing practical projects. Emphasis is placed on safe working practices with hand tools, power tools, timber finishes and methods of joining timber. Students will have experience of various types of timber products. Projects are designed to teach the skills of drilling, chiselling, planing, joining, finishing timber, fastening and lathe work. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

Course Title: Timber 2

Stage 5 Subject: Industrial Technology (Timber)

Students: Year 10 only

Prerequisite: General Wood 1 (2020)

Subject costs: \$150

For more information: see a TAS teacher

About the course: This course examines project design in greater depth than Timber 1. Students are asked to evaluate the quality of design for a given project. Students will be asked to interpret workshop and pictorial drawings as well as consider the working characteristics of timber. Projects are designed to reinforce knowledge gained in the previous lobe as well as introducing students to the assembly of boxes, frames and carcasses. This subject has a 70% practical and 30% theory split. Theory is an important part of this course and consists of formal theory lessons, homework, assignments and an exam.

INTEREST ELECTIVES

Please note that interest electives will not be reported on the RoSA.

Course Title: PHILOSOPHY

Students: Year 9 or Year 10

Prerequisite: None

Subject costs: Nil

For more information: see Ms Kelly or Ms Connolly

About the course:

This is an academically rigorous course that aims to broaden creative and critical thinking skills through an in depth study of:

- a variety of philosophers
- differing and conflicting ideologies
- ways of thinking.

Students will gain an understanding of problem solving through being encouraged to ask questions about the past, their world and considering future issues.

Course work will be based around case studies, drama activities and lively debates as well as a number of excursions.

This is a **wonderfully entertaining** course for those who love asking questions, engaging in colourful debates and discovering the hidden understandings that philosophy offers.

SATURDAY SCHOOL OF COMMUNITY LANGUAGES

The Saturday School of Community Languages gives students the opportunity to study the language they speak at home, if a course in that language is not offered at their own school or college.

The school is a public secondary school which operates only on Saturdays. Approximately 4500 students in Years 7-12, from both government and non-government schools and TAFE colleges, are enrolled.

Saturday School students follow Board of Studies syllabuses in 24 languages. These languages are assessable as part of their Stage 5 RoSA and Higher School Certificate.

What languages can you study?

Arabic, Armenian, Bengali (Bangla), Chinese, Croatian, Dutch, Filipino, Hindi, Hungarian, Italian, Japanese, Khmer, Korean, Macedonian, Modern Greek, Maltese, Persian (Farsi and Dari), Polish, Serbian, Spanish, Tamil, Thai, Turkish, Ukrainian, Vietnamese.

What are the benefits?

Studying the language you speak at home:

- helps students maintain rewarding relationships with their parents/caregivers, grandparents, relatives and other community members
- promotes in students a sense of cultural identity, resulting in heightened self-confidence and self-esteem
- provides an opportunity for students to develop high levels of skill in the language they speak at home
- improves students' performance across the curriculum
- places students in a better position to take advantage of employment opportunities.

See next page for a list of Languages and SSCL Centres.

How do I enrol?

Enrolment forms will be available in Term 4 from Mr Hoareau and from <https://saturdaycl-h.schools.nsw.gov.au/>

Please advise on your subject preference form if you intend to enrol in a language course.

SSCL Centres and Language Courses Available

The SSCL has 16 centres: 14 based in high schools in Sydney, one in Wollongong at Smiths Hill High School and one in Newcastle at Merewether High School.

Years 7–10 classes run for two hours, Years 11 and 12 classes for three hours, and Year 12 Extension classes for four hours.

Unless otherwise advised, classes start at 8.30 am.

LANGUAGES	CENTRES
Arabic	Arthur Phillip HS, Birrong GHS, Liverpool BHS, Smiths Hill HS, St George GHS
Armenian	Chatswood HS
Bengali (Bangla)	Liverpool GHS
Chinese	Ashfield BHS, Birrong BHS, Chatswood HS, Kogarah HS, Merewether HS, Randwick, Smiths Hill HS, Strathfield GHS The Hills Sports HS
Croatian	Liverpool BHS
Filipino	Bankstown GHS
Hindi	The Hills Sports HS
Hungarian	Bankstown GHS
Italian	Strathfield GHS
Japanese	Chatswood HS
Khmer	Liverpool GHS
Korean	Chatswood HS, Strathfield GHS, The Hills Sports HS
Macedonian	Bankstown GHS, Kogarah HS, Smiths Hill HS
Maltese	The Hills Sports HS
Modern Greek	Ashfield BHS, Chatswood HS, St George GHS, The Hills Sports HS, Smiths Hill HS
Persian (Dari/ Farsi)	Arthur Phillip HS
Polish	Ashfield BHS, Chatswood HS, Liverpool GHS,
Portuguese	Dulwich HS
Punjabi	Dulwich HS
Serbian	Dulwich, Liverpool GHS, Smiths Hill HS
Spanish	Ashfield BHS, Chatswood HS, Kogarah HS, Liverpool GHS, The Hills Sports HS
Tamil	The Hills Sports HS
Thai	Dulwich HS
Turkish	Arthur Phillip HS, Dulwich HS
Vietnamese	Birrong BHS, Dulwich HS, Liverpool BHS*/

THE NSW SCHOOL OF LANGUAGES

NSW School of Languages is a New South Wales government school and specialist language centre. The school offers a languages-only curriculum through the flexibility of distance education, providing 42 courses over 13 languages for students in Years 9 – 12 from both government and non-government schools.

NSW School of Languages observes the usual government school holidays and its hours are 9.00am to 3.30pm.

Students can apply through their school to study a single-course language at NSW School of Languages if they are unable to access that language at their home school.

How do students apply?

Applications must be lodged by the principal of the home school of enrolling students. Applications for Years 9, 10 and 11 should be lodged no later than 30th November for the following year.

A separate school service fee applies to all NSW School of Languages courses. The service fee covers the two-year course. In 2020 the fees were:

Years 9 and 10	\$210	
Years 11 and 12	\$210	(2021 fees TBA)

(These fees also apply to full fee-paying students from overseas in government schools.)

Application forms will be available from Mr Hoareau in Term 4.

What are the Benefits?

Studying by distance education:

- Promotes independence and equips students with skills useful for future studies
- Provides personalised learning at a pace decided by the student and teacher
- Enhances organisational and ICT skills

Studying a language:

- Increases literacy skills in English
- Helps develop our brains – we become more intelligent and more flexible and creative thinkers when we study a language.
- Promotes cultural awareness and understanding
- Increases your employability and career mobility
- Enhances travel experiences by enabling you to communicate with the locals

Language Courses Available

Chinese, French, German, Indonesian, Italian, Japanese, Korean, Latin, Modern Greek, Portuguese, Portuguese (Brazil), Russian and Spanish.

Please advise on your subject preference form if you intend to enrol in a language course.

THE END
